

IN THE NEWS

January 23, 2019

Intersec 2019 concluded its 21st edition conference and exposition yesterday, January 22. It was held at the Dubai World Trade Centre. Edwards was one of over 1200 leading exhibitors from 54 countries worldwide. The expo is the largest and most diverse platform for exhibiting safety solutions across the Middle East, Africa and the Indian subcontinent.

Edwards was a significant component of UTC's footprint at the event where new detection, signaling and control products were featured. Attendance was extraordinary and many partners, influencers and users of Edwards' products were able to spend one on one time with our leadership team. Jon Hughes, VP of Marketing for Edwards commented, "There was overwhelming excitement about our recent product developments, and a general recognition that we're an innovation leader in the life safety arena."
